

AMENDMENTS TO THE CLAIMS

Without prejudice, this listing of claims will replace all prior versions, and listings, of claims in the present application.

LISTING OF CLAIMS

1. (Currently amended) A gaming slip comprising:
a substrate; and
gaming information coupled to the substrate, the gaming information including a random request region corresponding to a game, wherein the random request region that enables a plurality of computer-generated picks to be requested for the game.
2. (Original) The gaming slip of claim 1, wherein the gaming information further includes a plurality of random request regions, each random request region corresponding to a different type of game.
3. (Previously presented) The gaming slip of claim 1, wherein each computer-generated pick includes a plurality of randomly-selected numbers.
4. (Original) The gaming slip of claim 1, wherein the random request region is part of a game panel, the game panel further including a manual selection region that enables a manual pick to be identified.
5. (Previously presented) The gaming slip of claim 4, wherein the game panel further includes a draw request region, the draw request region enabling the manual pick to be played for a plurality of drawings.

6. (Currently amended) The gaming slip of ~~claim 4~~ claim 2, wherein the gaming information further includes a plurality of game panels, each game panel corresponding to a different type of game, each game panel including one of the plurality of random request regions.

7. (Original) The gaming slip of claim 6, wherein each game panel has a manual selection region that enables a manual pick to be identified.

8. (Previously presented) The gaming slip of claim 4, wherein the manual pick includes one or more manually-selected numbers.

9. (Original) The gaming slip of claim 1, wherein the gaming slip is a lottery play slip.

10. (Original) The gaming slip of claim 1, wherein the gaming information is printed on the substrate.

11. (Currently amended) A lottery play slip comprising:
a substrate; and
gaming information coupled to the play slip, the gaming information including a plurality of game panels, each game panel respectively corresponding to a different ~~type of~~ game and having a random request region for the respectively corresponding game, the random request region enabling that enables a plurality of computer-generated picks to be requested for the respectively corresponding game, each game panel also having a manual selection region that enables a manual pick to be identified for the respectively corresponding game and a draw request region that enables the manual pick to be played for a plurality of drawings, each computer-generated pick including one or more randomly-selected numbers and each manual pick including one or more manually-selected numbers.

12. (Original) The play slip of claim 11, wherein the gaming information is printed on the substrate.

13. (Currently amended) A method of processing a gaming slip, comprising:
reading a random request region of the gaming slip, the random request region corresponding to a game; and
generating a plurality of picks for the game, the number of picks based on information read from the random request region, each pick including a plurality of randomly-generated numbers.

14. (Currently amended) The method of claim 13, further including:
reading a plurality of random request regions of the gaming slip, each random request region corresponding to a different type of game; and
generating a plurality of picks for each type of game, the number of picks generated for each type of game being based on information read from the random request region corresponding to each game type.

15. (Original) The method of claim 14, further including tracking game data for the gaming slip based on each type of game played on the gaming slip.

16. (Original) The method of claim 13, wherein the gaming slip is a lottery play slip.

17. (Currently amended) An article of manufacture having stored thereon instructions adapted to be executed by a processor, the instructions which, when executed, define a method comprising:
reading a random request region of a gaming slip, the random request region corresponding to a game; and
generating a plurality of picks for the game, the number of picks based on information read from the random request region, each pick including one or more randomly-generated

numbers.

18. (Currently amended) The article of manufacture of claim 17, wherein the defined method further comprises:

reading a plurality of random request regions of the gaming slip, each random request region corresponding to a different type of game; and

generating a plurality of picks for each type of game, the number of picks generated for each type of game being based on information read from the random request region corresponding to each game type.

19. (Previously presented) The article of manufacture of claim 18, wherein the defined method further comprises:

tracking game data for the gaming slip based on each type of game played on the gaming slip.

20. (Previously presented) The article of manufacture of claim 17, wherein the gaming slip is a lottery play slip.

21. (Currently amended) The gaming slip of claim 1, wherein the random request region corresponding to the game comprises a plurality of boxes, and wherein the number of computer-generated picks for the game is indicated by marking one of the plurality of boxes ~~at least one set of boxes, at least one of the at least one set of boxes having a plurality of boxes, and the number of computer-generated picks is determined by filling out at most one box in each of the at least one set of boxes.~~

22. (Currently amended) The gaming slip of claim 21, wherein ~~each of the at least one set of boxes corresponds to a decimal digit of the number of computer-generated picks~~ marking one of the plurality of boxes indicates the selection of ten computer-generated picks for the game.

23. (Currently amended) The gaming slip of claim 21, wherein ~~at least one of the~~
~~at least one set of boxes~~ the plurality of boxes is visually separated from the rest of the
gaming information.

24. (Previously presented) The gaming slip of claim 1, wherein each computer-
generated pick is an entry for a draw of a future draw game.

25. (Previously presented) The gaming slip of claim 24, wherein all the computer-
generated picks are entries for the same draw.

26. (Currently amended) The gaming slip of claim 6, wherein all the games
corresponding to ~~each of~~ all the game panels are simultaneously played.

27. (Previously presented) The gaming slip of claim 6, wherein each game panel
corresponds to a different type of game.

28. (Previously presented) The gaming slip of claim 1, wherein the substrate is a
single solid piece of paper.
